

Roll-Rite® Super Duty EX Series

High Capacity Tarp Systems

for Scrap & Gondola Trailers

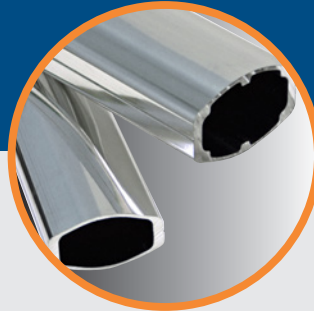

Roll-Rite® Super Duty EX Series

Electric Motor

High Capacity Housing

EX Arms & Bows

EX Pivot Mount

Quality, durable tarp components engineered for demands of extreme trailer tarping

Super Duty EX Tarp Systems May Include:

■ The Electric Motor:

Reliable, Long-Life. Our patented Super Duty gear motor, designed for extreme tarping, is engineered for high torque demands and features a spur and helical gear configuration with forged heat treated gears and precision ground bearings for a much longer-life transmission. Unlike competitive tarp motors, the Super Duty can reach peak performance because it requires only **half the amp draw** of any other tarp motor. The Super Duty features the industry's only 5-year non-prorated warranty against premature wearout

■ The High Capacity Housing:

High Capacity housing is roomy enough to hold up to 57 ft. of Super Tough mesh or up to 46 ft of Pleated Super Tough that expands up to 10' wide to cover heaped loads. High Capacity housing can be installed in two orientations, including a 'low-mount' option which

allows tarp arm to drop forward below the top rail for no added height to trailer and obstruction free loading. Installs in half the time of a standard housing using no gussets and 1/3 of the fasteners (2/3 less holes to drill)

■ The Roll-Rite Extreme Duty Arms:

Durable Construction, Professional Appearance. Extreme duty lower pivot arm and telescopic upper tarp arm are made from a specially treated, high strength extruded aluminum alloy. Extreme arms are designed to stand up to the demanding and extreme needs of scrap and gondola trailer tarping

■ The Extreme Under Body Pivot Mount:

Compact design features narrow profile and external mounting flanges for easier installation, eliminating side wall bolts. Pre-set pin for optimal tension based on spring capacity eliminates guesswork. Patented roller-bearing

technology for smooth operation. 12-spring to 16-spring capacity to deliver appropriate tension for trailer tarping

■ The Rite-Touch™ Controls:

Power tarp operations with Rite-Touch controller, a motor reversing relay used in conjunction with a 35-Amp breaker protects the Super Duty gear motor and wiring. Momentary rocker switch stops the tarp when switch is released. 35-Amp breaker protects the Super Duty gear motor in cases of unforeseen damage to wiring

Super Duty EX8012

For Scrap Trailers Using Up to 48 feet of Tarp — System Part No. 68012:

- Super Duty Gear Motor, 104" Tarp Spool with High Capacity Housing
- 12-Spring Extreme Under Body Pivot Set
- 264" Tarp Arms and Wide Tarp Bow Set

Super Duty EX8016

For Scrap Trailers Using Over 48 feet of Tarp — System Part No. 68016

- Super Duty Gear Motor, 104" Tarp Spool with High Capacity Housing
- 16-Spring Extreme Under Body Pivot Set
- 264" Tarp Arms and Wide Tarp Bow Set

- The Spiral Torsion Spring is heat treated and teflon coated for longer life, enhanced performance and corrosion resistance.

Options & Accessories:

Convenient options and trailer accessories are available from Roll-Rite:

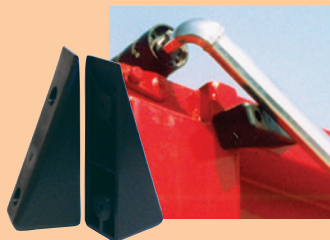

- Heavy Duty Dual Conductor Plug Set
- Rite-Touch™ Electric Kit with Amp Sensing Technology has built-in protection with auto shut off to prevent tripping of breaker on tarp wind up if operator does not release switch. Eliminates hassle of resetting tripped breakers and prevents downtime
- Bow Centering Wedges: Bows will lay centered and square, for a clean professional appearance as well as adding extra stability to the bows

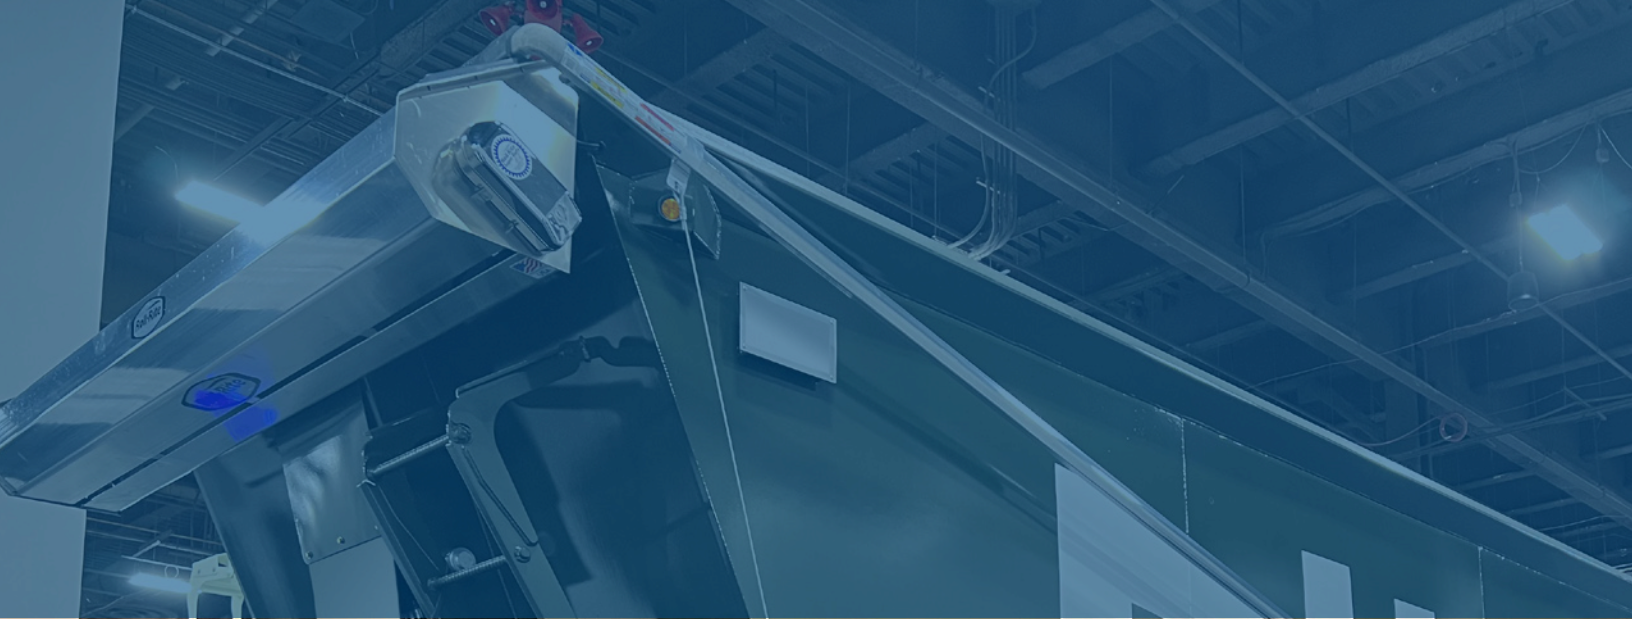

- Dual Conductor Plug Set

- Rite-Touch™ Electric Kit Option

- Bow Centering Wedges

Tarps By Roll-Rite®

Leading design and durability starts with premium fabrics and ends with detailed fabrication. With state-of-the-art fabrication techniques Roll-Rite delivers the most durable tarps with a longer life-cycle.

- Single Piece Construction
- Reinforced Corners and Seams (Double-Stitched or Welded)
- Rear Tarp Rod Pocket Completely Lined And Reinforced With Grommets

Super Tough Mesh

- Load Type:
Challenging Scrap,
Refuse & Recycling
- Fabric:
Premium 16 oz
heavy, 7x7 weave
with 7,500 denier UV
protected strands
of polypropylene
breathes enough to
minimize flapping
- Key Benefit:
Users experience
3x-5x the wear life
over other scrap/
refuse tarps
